Work Experience

Solutions by STC – Riyadh, KSA Software Engineer

August 2023 – Present

- Designed and delivered enterprise software solutions supporting government-sector initiatives, aligning technical implementation with business and operational requirements.
- Collaborated with clients, business stakeholders, and cross-functional teams to translate requirements into scalable applications, system integrations, and process improvements.
- Developed and optimized APIs, backend services, and system integrations, reducing average data processing times by approximately 40% across multiple projects.
- Resolved 50+ critical production issues and defects, ensuring platform stability, reliability, and uninterrupted business operations.
- Delivered 100+ software enhancements and automation solutions, improving workflow efficiency, usability, and overall system performance.
- Contributed to CI/CD and DevOps initiatives using modern deployment practices, reducing average deployment times by approximately 50% across project releases.
- Produced and maintained technical documentation, solution designs, and knowledge-sharing materials to support development, troubleshooting, and long-term maintainability.
- Supported data analytics, reporting, and digital transformation initiatives by delivering scalable technology solutions for strategic decision-making.

Mohammed Bin Rashid Space Centre – Dubai, UAE AI Engineer

January 2022 – January 2023

- Developed AI models for satellite image analysis using novel UAE imagery, supporting urban planning and infrastructure decisions.
- Applied AI-driven insights from the project to optimize strategic urban planning across the UAE.
- Bridged technical insights with business strategy, helping decision-makers leverage AI for real-world problem-solving.
- Increased sample data by 300% through data augmentation techniques, ensuring sufficient data for training, validation, and testing.
- Automated data preprocessing pipelines, cutting data preparation time by 60% and accelerating AI model deployment.

Education

Harvard Business School Data Science for Business

November 2024 – January 2025

American University of Sharjah Bachelor of Science in Computer Science

September 2018 – January 2023

Technical Skills

- Programming:** Python, Java, JavaScript, SQL, C#, R
- Development:** Docker, Kubernetes, React, Django, KillBill
- Cloud & DevOps:** AWS, Azure, Terraform, CI/CD (Jenkins)
- Security:** OWASP, IAM, SSO, OAuth
- Data Science & Analysis:** NLP, Computer Vision, Quantitative Analytics, SAS Enterprise Miner
- Databases:** PostgreSQL, MySQL, MongoDB, Redis
- Productivity & Consulting Tools:** Git, JIRA, Confluence, Microsoft Office, Google Workspace, Power BI, Tableau

Certifications

- Project Management Professional** - PMI
- Certified SAgile 6 Agilist** – Scaled Agile, Inc.
- AI Security & Governance** – Securiti
- Professional Web Developer** – OutSystems
- Web Developer Specialist** – OutSystems
- Architecture Specialist** – OutSystems
- Security Specialist** – OutSystems
- Associate Reactive Developer** – OutSystems
